

MONTINI

SPECIAL ELECTRIC FORKLIFT TRUCKS

THE NEW **COMPACT** FORKLIFT TRUCKS

MR
1.7
COMPACT

MR
2.0
COMPACT

MR
2.5
COMPACT

After the “Revolution” in its range of heavy-duty forklifts, MONTINI presents the new electric 4-wheel forklift trucks of the “MR COMPACT” series: a new “Revolution” in the field of compact forklifts.

UNRIVALLED COMPACTNESS

WHY SO COMPACT?

Because these forklifts are standard equipped with **MONTINI SUPER STEERING**, i.e. rear axle steering up to 101 degrees so it can steer in the same space as a 3-wheel forklift.

MR COMPACT forklifts are ideal vehicles for meeting the compactness required by users who need an **unbeatable turning radius for maximum efficiency when operating in fruit and vegetables warehouses, narrow storage aisles, cold stores and confined spaces.**

MR
1.7
COMPACT

(48V - 1750 kg nominal capacity at load centre 500 mm)

Length (l2): 1945 mm
Width (b1): 1030 mm
Turning radius (Wa): 1558 mm

MR
2.0
COMPACT

(48V - 2000 kg nominal capacity at load centre 500 mm)

Length (l2): 1945 mm
Width (b1): 1050 mm
Turning radius (Wa): 1558 mm

MR
2.5
COMPACT

(80V - 2500 kg nominal capacity at load centre 500 mm)

Length (l2): 2120 mm
Width (b1): 1180 mm
Turning radius (Wa): 1685 mm

EQUIPPED WITH BATTERIES WITH A HIGH AMP/H CAPACITY

FOR PROLONGED OPERATING AUTONOMY

The forklifts in the “MR COMPACT” range can be equipped with **high Amp/h capacity batteries**, up to 1120Ah (for 48V forklifts) and 860Ah (for 80V forklifts), so as to:

- meet **any kind of work requirement** (wide range of batteries for demanding applications; low water consumption; for very heavy and intensive applications, in particular for forklifts fitted with auxiliary equipment);
- guarantee **unbeatable work autonomy** (up to 14 hours/day);
- **work better, work more**, while safeguarding health and the environment.

MR
1.7
COMPACT

48V - maximum battery 1120Ah

MR
2.0
COMPACT

48V - maximum battery 1120Ah

MR
2.5
COMPACT

80V - maximum battery 860Ah

Battery box and cover are designed so as to convey any fumes out of the driver's cab.

New catch for easy opening of the battery cover.

RECORD LOAD CAPACITIES

AT MAXIMUM LIFT HEIGHT, IN TOTAL SAFETY

The **lifting units**, designed and manufactured by MONTINI, are **available in Duplex (DX) and Triplex (TX) versions, with total visibility (T.V.) and total free lift (T.F.L.)**, so as to:

- have maximum smoothness and greater stability;
- meet the most varied working requirements;
- ensure total safety during high lifts and optimum load capacity.

MR
1.7
COMPACT

1350 kg
lift height 5600 mm
load centre 500 mm

MR
2.0
COMPACT

1500 kg
lift height 5600 mm

1600 kg
lift height 6950 mm
load centre 500 mm

SAFETY, COMFORT, MANOEUVRABILITY, AUTONOMY

THE BEST WAY TO WORK

THE BETTER YOU WORK, THE MORE YOU WORK

Standard equipped with hydraulic control valve with 3 handy levers, made of pleasant to handle soft material, for lifting, sideshifting and tilting operations.

Possibility to equip the forklift truck with optional 4th and 5th levers to the control valve, with hydraulic piping up to the fork carriage.

The 4th and 5th functions are required when installing an auxiliary equipment on the forklift truck.

PRECISION AND PERFORMANCE, THANKS TO THE HYDRAULIC CONTROLS

These forklift trucks can be equipped at choice with **different hydraulic controls** to ensure maximum efficiency and productivity, not to mention exceptional driving comfort.

The intuitive and ergonomic hydraulic control with **joystick** allows the operator to activate all the hydraulic functions of the lift truck using a single control lever. Maximum productivity thanks to the use of two simultaneous operating functions of the lifting unit.

The simple to use and easily accessible hydraulic control with **fingertips** (mini-levers) is installed in an ergonomic and adjustable armrest. Simply operate the fingertip controls gently for agile, precise and safe handling.

The hydraulic control with **pilot levers** (mini-joysticks) makes driving the forklift truck easy and reliable. Easily accessible and simple to use, it is installed in an ergonomic and adjustable armrest to guarantee comfortable driving positions.

ELECTRONIC TECHNOLOGY

The **innovative electronic technology**, developed in German research laboratories, **with alternating current inverters and Can Bus communication**, guarantees high efficiency and low energy consumption; it comes with a new diagnosis system for keeping everything under control and reducing any machine downtime.

The large colour display, with multifunction buttons, **ensure accessibility and control of the forklift's basic functions**.

The functions are defined by icons displayed on the relative bar, for example:

-  handbrake locked;
-  seat belt not fastened;
-  seat switch open;
-  rear wheel not straight;
-  brake fluid level too low;
-  maintenance hour meter expired;
-  activates "tortoise speed";
-  deactivates "tortoise speed".

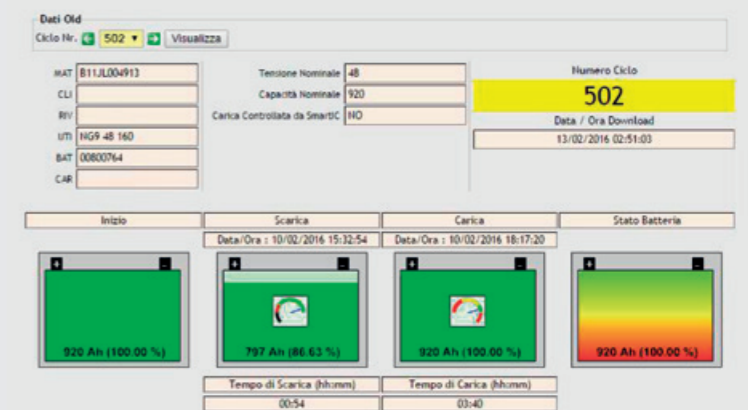

Access password personalised for the operator.

SERVICES AND SAFETY

Possibility to equip the forklifts with **GPRS system** (General Packet Radio System), mobile phone technology, installed on the battery of the forklift, **to check:**

- **correct battery use and management** (to check regular charge and discharge of the battery, correct operation of the battery charger during charging and the electrolyte level inside the battery cells);
- **the registration of possible forklift collisions.**

Possibility to equip forklifts with the **innovative "Remote Control" system** for rapidly detecting any electric faults through remote data transmission, to localize the forklift, activate the anti-theft device and block the forklift functions.

EQUIPMENT VARIATIONS

OVERHEAD GUARD

Overhead guard designed to be equipped easily with cab at any time, without having to modify or replace the original structure.

It can be cabled:

- with full panelling, complete with windows and windscreen wipers, also on the overhead guard;
- with or without heating system.

SOUNDPROOFED OVERHEAD GUARD

The overhead guard on the MR 2.5 COMPACT XL forklift, is joined to the forklift chassis using **6 special vibration dampers (silent block)** which reduce vibrations and noises inside the cab for increased operator comfort.

HEATED WINDOWS

As an optional, cabs can be with **innovative heated (or thermal) windows**.

The heated window is made from “coated” glass, with anti-fogging as its main feature.

Coated glass is made by depositing metal oxides with good electric conductivity and optical transparency on the surface.

Electricity is passed through the coating and guarantees total resistance to fogging while at the same time creating the ideal temperature inside the cab for the operator.

SPECIAL OVERHEAD GUARD

Special overhead guard for **drive-in** version, with adequately protected LED lights.

SAFETY GRID

Upper protection iron grid on the overhead guard when fitted with glass and wiper, for protection against accidental load fall.

HEATER

The **heater**, available as an optional extra, directly and quickly heats up the cab interior thanks to the hot air vents, thus making sure that the temperature inside the cab is always comfortable.

HYDRAULIC FORK POSITIONER

The MONTINI lifting unit has been designed to offer the best visibility in all working conditions.

A newly designed sideshift has been incorporated into the lifting unit which is very compact and provides excellent visibility.

The optional MONTINI hydraulic fork positioner allows precise movement and positioning of the forks.

LIGHTING EQUIPMENT

Adjustable LED working lights.

Blue LED device to signal the forklift's presence (blue spotlight).

SEATS

“Grammer Primo M” standard seat.

Standard equipped with “Primo M” PVC seat which reduces vibrations transmitted to the operator.

- 1 Lumbar support
- 2 Seat belt
- 3 Backrest adjustment
- 4 Weight adjustment
- 5 Longitudinal adjustment

“Grammer Primo M” seat kit complete with armrests and headrest, in fabric (optional).

Optional possibility to set **different parameter configurations for the safety belt** in order to prevent or rather to eliminate dangers and damages deriving from incorrect use of safety belt by the forklift driver while working.

New design concept applied to the seat. “Grammer Primo L” seat (optional).

Seat kit with armrests and headrest, in PVC or fabric, also with heating.

- 1 Headrest
- 2 Heating system
- 3 Tilting left armrest
- 4 Tilting right armrest
- 5 Fabric cover
- 6 Pneumatic suspension
